

## Masks – Constant Flow

Designed to operate with Factair's range of Mobile Breathing Air Compressors and Safe Air Cabinets, as well as a range of other industry standard equipment, the masks and hose range provides the best possible protection for operatives working in hazardous environments.

### Constant Flow Masks – Instantair connections PF

The PF comprises a Kemira SARI full-face mask (protection factor of 40), belt, flow control valve, supply hose and Factair Flowcheck to ensure the correct flow is being supplied to the mask. The assembly conforms to TM14/7.23. The Kemira SARI full face mask, is an EN 136 device and the combination is CE marked, has a wide field of vision, is comfortable and reliable. The face piece incorporates a speech diaphragm and ori-nasal inner mask with separate inhalation and exhalation valves. An internal ducting system prevents misting of the visor and the head harness allows both helmet and ear protectors to be worn.

### Other options available

<b>PAF</b>	SARI full face mask only
<b>PAC4</b>	Belt and control valve assembly only (woven belt)

## Masks - Demand Type

Designed to operate with Factair's range of Mobile Breathing Air Compressors and Safe Air Cabinets, as well as a range of other industry standard equipment, the masks and hose range provides the best possible protection for operatives working in hazardous environments.

### Demand Type Masks – CEJN connections Flite-10

The Flite-10 airline breathing apparatus incorporates an emergency breathing facility. The set comprises an automatic positive pressure demand valve, supply hose and pigtail with CEJN coupling, bandolier harness and 2-litre, 200 bar allow steel cylinder. The cylinder conforms to BS 5045 part 1 and contains a free air capacity of 400 litres which provides a nominal duration of 10 minutes escape time. The Flite-10 is designed to be used with the Panaseal positive pressure facemask which has a nominal protection factor of 2000.

**Sabre Flite-10 with Facemask**

### Other options available

<b>FLITE</b>	As above but without the 2-litre escape cylinder
<b>071.304.00</b>	Panaseal positive pressure facemask
