

Designed to be used in-conjunction with the Factair FM17 mini cable blowing compressor, the M17 blown fibre filter cabinet is designed to further filter the compressed air to a standard suitable for the installation of fibre unit in ducts ranging from 4/2.5mm to 8/6mm. Mounted in durable, impact resistant polyethylene housings the blown fibre filter cabinets are fitted to portable free standing carry frames for ease of use. Each unit incorporates a 0-16 barg pressure regulator, pressure gauge and automatic condensate collection.
